~ A revolutionary IT Learning Pathway

Koh Chye Soon
Head of ecole, 42 Singapore
Singapore University of Technology and Design

Singapore University of Technology and Design

To advance knowledge and nurture technically-grounded leaders and innovators to serve societal needs, with a focus on Design, through an integrated multi-disciplinary curriculum and multi-disciplinary research.

Establishment of SUTD in 2010 in collaboration with MIT

Bringing in MIT's DNA

"The basic aim of education is not to accumulate knowledge, but to learn how to think creatively, teach oneself, and seek answers to questions as yet unexplored." (Jim Killian, MIT President 1948-1959)

MISSION:

To nurture technically-grounded leaders and innovators to serve societal needs through an inter-disciplinary, design-centric education and research

SUTD's tuition-free coding school draws 3,000 applicants for first intake

42 Singapore is a new coding school, born from a partnership between @sutdsg and France's Ecole 42. It is tuition-free, with no teachers, no classes, no books. What matters most is your ability to think critically and work with others, and it is open to all regardless of your credentials or grades. It seeks to equip students and mid-career individuals with in-demand tech skills through gamification and peer-to-peer learning.

This is the very notion of continuous meritocracy, where people are given the opportunity to contribute, at any point of their lives, so long as they are willing and able.

This collaboration has been in the making for nearly five years, and I am thankful for the support of our friends from France, Ecole 42 and our industry partners. I hope Singapore's vision of aptitude beyond academics will be a trailblazer in our higher education landscape, and inspire more of such partnerships to reskill and upskill our workforce.
